

Some Important Information about SAP Authorization Objects as a Functional/Technical Consultant

Introduction

One of the biggest reason SAP has been successful is because it is very Secured and Auditors love it as it has all the components of SOX System.

What is Authorization Object?

An **authorization** enables you to use certain functions in the **SAP** System. Every **authorization** relates to an **authorization object** and defines a value or values for each **authorization** field contained in the **authorization object**. **Authorizations** are grouped into profiles that are entered in the user master record.

In this Blog we are going to discuss the following.

1. How to Find Authorization Object Associated with a Transaction Code in SAP?
2. How to know Authorization Object of anything by just the Name in SAP?
3. How to get Authorization Object by Process Area in SAP?
4. How to get all the Activity Authorization Object in SAP can Function?
5. How to find the different Activity types for Authorization Object?

Solution

1. How to Find Authorization Object Associated with a Transaction Code in SAP?

Go to SE16N Transaction Code

Please Provide Table TSTAVT

The screenshot shows the 'General Table Display' window for table TSTAVT. The 'Table' field is set to TSTAVT. The 'Maximum no. of hits' is set to 500. The 'Selection Criteria' table is as follows:

Fld name	O...	Fr.Value	To value	More	Output	Technical name
Transaction Code					☒	TCODE
Object					☒	OBJECT
Field Name					☒	FIELD
Language					☒	SPRSL
Message ID					☒	ARBGB
Program					☒	PGMNA
Number					☒	DYPNO
CHAR05 data element					☒	MENUE
HEX01 data element f					☒	CINFO
Value					☒	VALUE
Text					☒	TTEXT

Provide the Transaction Code or Transaction Codes you want to Check. Below example shows we are checking ME21N

The screenshot shows the 'General Table Display' window for table TSTAVT. The 'Table' field is set to TSTAVT. The 'Maximum no. of hits' is set to 500. The 'Selection Criteria' table is as follows:
