

PFCGMASVAL - Streamlining SAP Role Updates with PFCGMASVAL

1. Change Org Levels

Goto Transaction **PFCGMASVAL** → **Enter Role Details** → **Select Execution with Previous Simulation** (to validate changes before actually applying changes)

The screenshot displays the 'Mass Maintenance of Authorization Values' dialog box in SAP. The 'Standard Selection' section shows 'Roles' with a search criteria 'Z*' and a 'Roles with Authorization Data' button. Under 'Execution', the 'Execution with Previous Simulation' radio button is selected. The 'Role Transport' section indicates 'Evaluation of SCC4 setting not active'. The 'Type of Field Change' section has 'Change Organizational Levels' selected. The 'Change Organizational Levels' section shows 'Change' set to 'Add' and 'Organizational Level' checked, with 'Values to Be Replaced' and 'Values' buttons. The 'Options' section is partially visible at the bottom. The SAP logo and transaction code 'PFCGMASVAL' are visible in the bottom right corner.

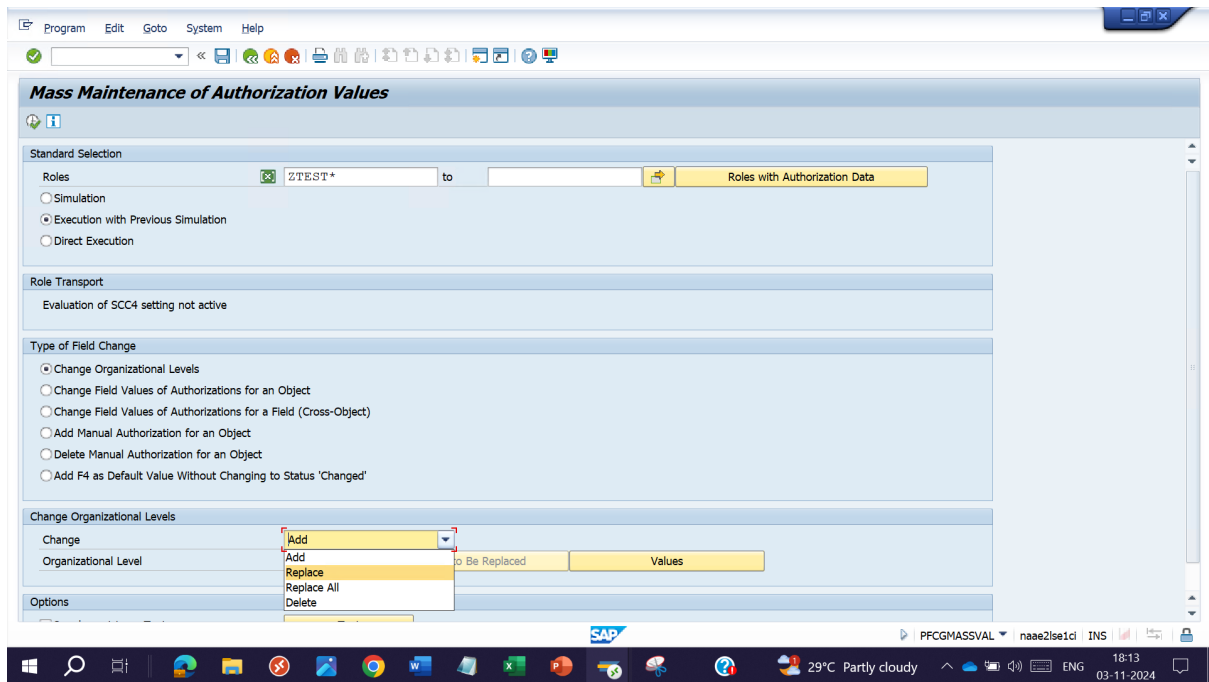

For Organization Level update we have below Options:

Add – In case you want to add new Value to existing values (Eg. New Company Code to be added to role)

Replace – In case you want to replace a value (Eg. Any Plant is getting removed or getting replaced with new plant)

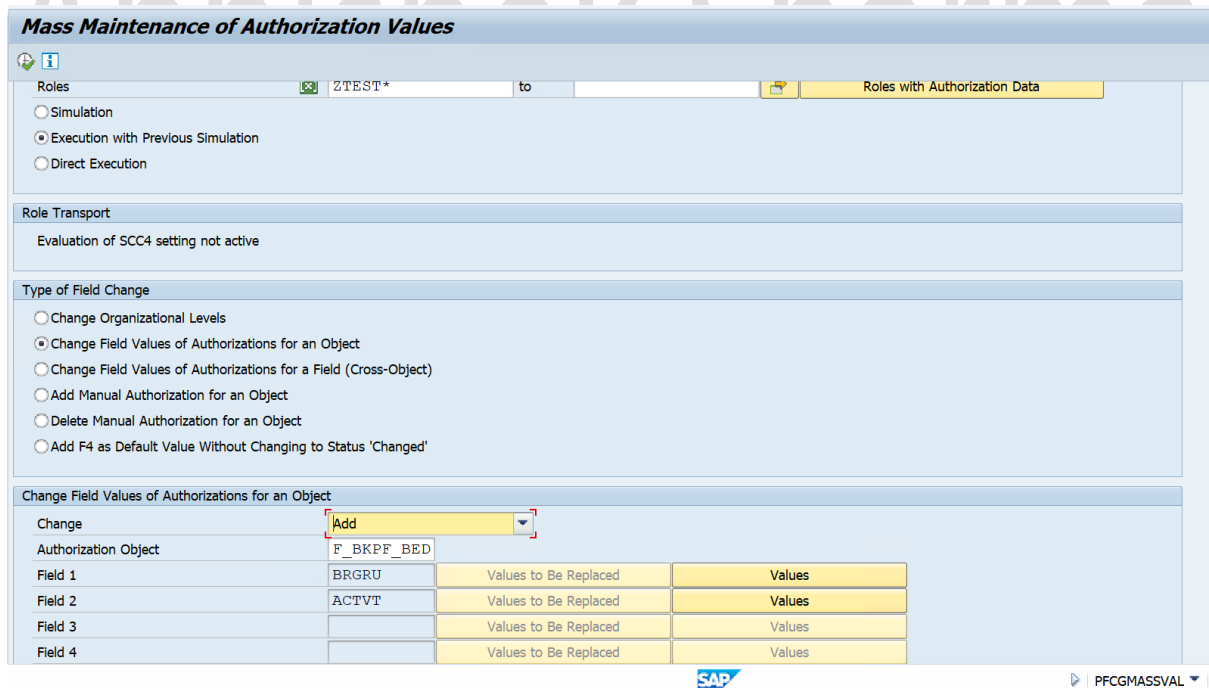

Replace All – This option will replace all the existing Org Values in selected role

Delete – To delete Values for Org level in selected role.

2. Change Filed Values of Authorization for an Object

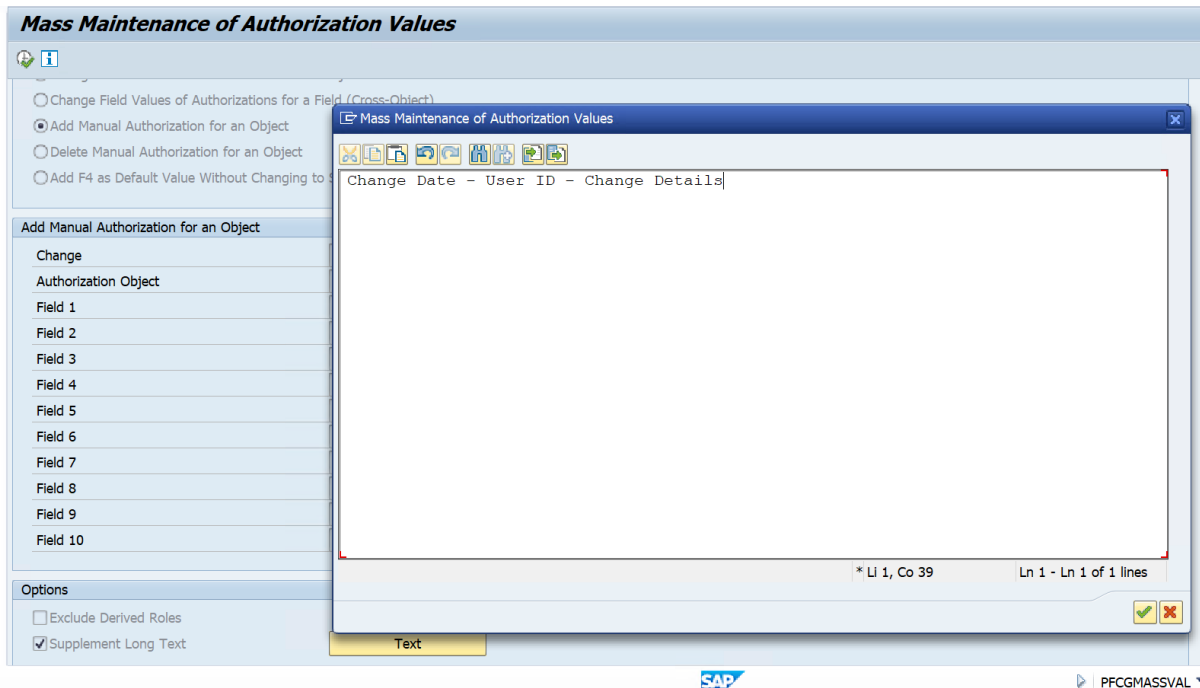

This option allows to Update Field Values for Authorization Object is selected roles

3. Add Manual Authorization for an Object: - This functionality can be used to add an Object Manually to multiple roles

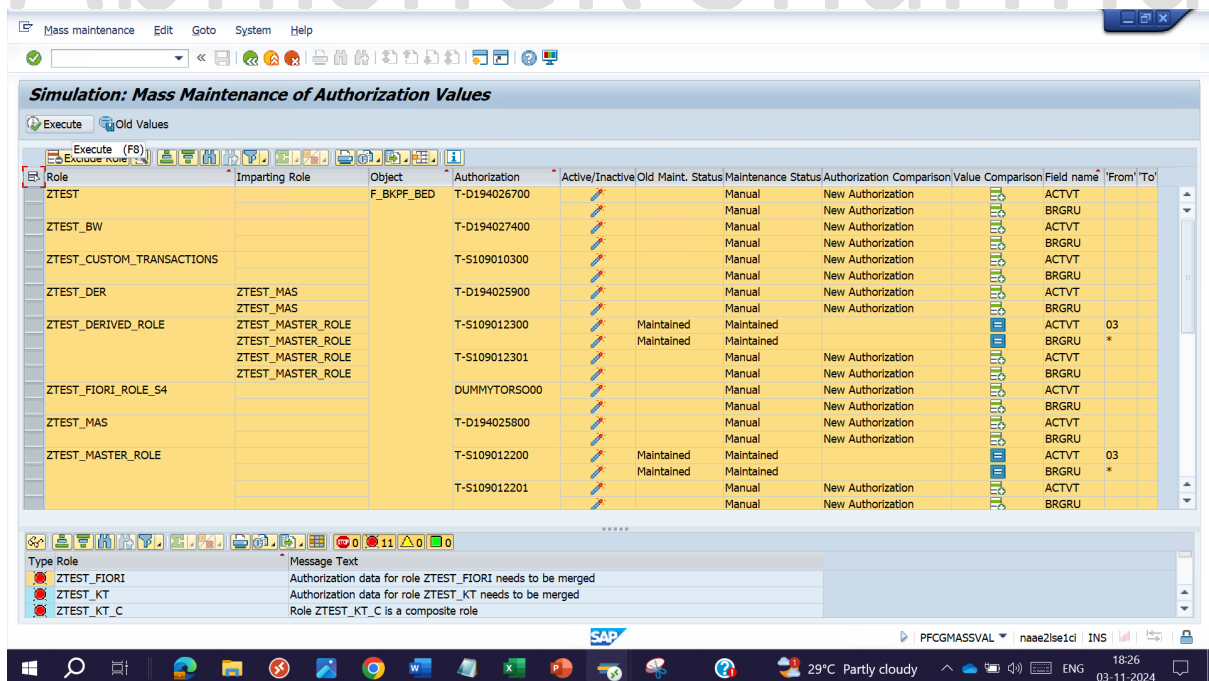

4. Delete Manual Authorization for an Object: - This functionality can be used to delete an Object Manually to multiple roles

Pro Tips: We can add Change Details in Roles to be Displayed in long text for Role Description by selecting Supplement long text and providing the details

Note:

Once validated the Simulation result, select execute to make changes to role:

After Changes are done always make sure to generate roles by selecting Generate Profiles

Mass maintenance Edit Goto System Help
